Table lamp is a unique way of creating and highlighting a corner in your room. Other than just enhancing the whole look it also has real use. It is a good source of light in the room. With so many designs option to pick from and with popular lighting fixture you can definitely find one that will fit perfectly in your place. Depending on your personal choice, taste and budget you can choose from a wide range. Experiment with various design and style which emphasizes the complete look of the room making it more distinctive from other usual looks. Tiffany lamps, mica lamps, wrought iron lamps, and wood lamps etc are just few most popular types of lamps.

Tiffany lamp has various pieces of colored stained glass joint together helping in adding more vibrant color to the corner. This is hand-operated made from a stained glass. Tiffany lamps are all uniquely designed and none of them are identical for these table lamps are all skilfully handmade that has fine unlimited shadings. The price of these lamps depends on the type of glass used, quality and level of details the shade of the tiffany has. Normally the price is high for the panel having more colors to it.

It was the early twentieth century when tiffany and mica lamps were first introduced. It had become one of the best selling table lamp styles at that period. Mica lamp is made from mixing various minerals that separates easily and turns into very thin leaves. You can find these lamps in many shades like greens, blacks, yellows etc. It gives a mystic look that is very beautiful to people's eyes when mica lamp is turned on. Every shade of these mica lamps is unique with a various mineral patterns and color tones.

Wrought iron lamp as the name itself explains is made from iron which is gives a beautiful and distinct looks with a good source of quality light. Wrought irons can come in infinite designs as they can be bent, formed and welded to make a distinct look for each lamp. They go pretty well with light color background setting. Generally wrought iron is more affordable than the other lamps such as tiffany lamps.

Other type of lamp is wood lamps, it is much simpler and omits natural light which gives a very soothing effect and clams you down. This is one of the reasons why they are so popular and is first choice of many buyers. This type of lamp design is best for ethnic or antique setting of interior. If you have a modern setting then you can experiment with the colors and texture of the lamp and place it accordingly to enhance the complete look of the house.

Wood lamps is another type of lamp which are simpler yet very unique as they illuminate the whole place with much natural light which is very clam and has soothing affect. This is one of the reasons why they are so popular and is first choice of many buyers. This type of lamp design is best for ethnic or antique setting of interior. If you have a modern setting then you can experiment with the colors and texture of the lamp and place it accordingly to enhance the complete look of the house.

Table lamp other than making the place look more beautiful also add dimension to the room. Light illuminating from the corners of the room is perfect to create a beautiful look.
